

**A Very Hungry Caterpillar
Very Hungry for Science Experience, Grades PreK-K**

Learn about life cycles, appetites, and communication by exploring the tiny creatures of our favorite Eric Carle books. Here's your peek at the week:

Day 1, All About Caterpillars: Study caterpillars and how they become butterflies.

Day 2, Circle of Life: Explore how different animals grow up and become adults. The day ends with a race to become a beautiful butterfly.

Day 3, A Bottomless Pit: How much did the very hungry caterpillar eat? There are some animals who eat 80% of what they weigh.

Day 4, Home Sweet Home: Animals need shelter and space to survive. How many different types of shelters can you think of? Could you make your own?

Day 5, Chatterbox: All animals communicate. How well can you communicate when you cannot use your words?
