

Quit Bugging Me A Bug's Adventure in Science for Grades K-1

Observe some of nature's coolest critters up close and discover what makes them so bizarre!
Here's your peek at the week:

Day 1, What Makes an Insect: Come learn how to identify an insect. We will learn the different parts of an insect and observe insects in a natural environment . . . our own backyard!

Day 2, Arachnids: Get a closer look at an arachnid. We will learn about why spiders are very important to humans.

Day 3, Metamorphosis and Life Cycles: Explore the life cycles of different bugs. We will learn the phases of complete metamorphosis and explore the world of everyone's favorite metamorphic bug: the butterfly.

Day 4, Bugs with Jobs: Take a look at bugs that have specialized jobs just like people. Ants, bees, and the amazing dung beetle all have important jobs to perform.

Day 5, Bugs are Everywhere: Come explore a few bugs that are not always good for people. We will also find out how many bugs we will eat in our lifetime! Yum!
