

Water Wonders

Wet Science for Grades PreK-K

Find out why water is important, where it comes from and how the water in your bathtub is the same water the dinosaurs drink.

Day 1, All About Water: What happens when you spray blue water at a block of ice? Can we get oil and water to mix? Come learn the properties of water.

Day 2, Rain: Discover what raindrops are made of and how we can measure how much rain really falls!

Day 3, Clouds: What are clouds? How do clouds form? Will that cloud rain on me? Become experts at cloud spotting.

Day 4, Lakes, Rivers and Oceans: What really is the difference between a lake and an ocean? How long has that water been there? And where will the water go next?

Day 5, Water Cycle: Put together your knowledge of water, rain clouds and bodies of water to understand the whole water cycle!
